

Formulary drug search

Prescription medication prices are among the fastest growing costs in health care. Using your Formulary can help you and your doctor make informed decisions about your medication.

The Formulary is a list of commonly prescribed medications preferred by your plan for safety, cost and effectiveness. Drugs are listed by common categories or class and are placed into cost levels known as tiers. The Formulary includes both brand and generic prescription medications approved by the U.S. Food and Drug Administration.

OptumRx reviews formularies twice a year and may make changes based on clinical effectiveness and health care value. The Formulary is not a complete list of covered medications and not all medications may be covered. Visit optumrx.com for up-to-date coverage and medication price information.

Search for your medication at optumrx.com to confirm coverage.

The screenshot shows the OptumRx website interface. At the top, there is a navigation bar with the OptumRx logo, user name 'Corinne (sign out)', Messages, and Cart. Below the navigation bar, there is a 'Member tools' dropdown menu. A yellow circle with the number '1' is placed over the 'Member tools' dropdown. A yellow circle with the number '2' is placed over the 'Drug information' option in the dropdown menu. The main content area shows 'My Medicine' section with a search bar and a 'Print' button. Below this, there are several medication cards, each with a name, 'View details' link, and 'Pricing not available' status. The cards include: LEVOTHYROXINE TAB 0.075MG, LUER-LOK 3CC MIS 5/8-25G, and METFORMIN TAB 1000MG.

Log in to optumrx.com.

- 1 Click on **Member tools** in the dropdown menu.
- 2 Select **Drug information**, where you'll see detailed information about specific medications.

Drug pricing will show the cost you'll pay for the medication.

Enter the medication name and you'll land at the Drug search result page (over).
